

**MATERIALS:**

½" Plywood
 Paint Stirrer Sticks or Lattice
 3/8" Wooden Dowel
 2 – 1" Round Wooden Ball Knobs
 2 – Packages of Wooden Pegs
 Wood Glue

CUT LIST:

1 – ½" plywood @ 12" x 16" (monogram)
 2 – 1x2 @ 12" (sides)
 2 – 1x2 @ 13" (peg boards)
 2 – ½" plywood "J" shape (hooks)
 1 – lattice @ 16" (top earring holder)
 1 – lattice @ 14 ½" (bottom earring holder)
 1 – 3/8" dowel at 15 ½" (bracelet rack)

TOOLS:

Tape Measure

Drill with 13/64" and 3/32" Drill Bits

Jigsaw and/or Scroll Saw

Safety Glasses

Speed Square

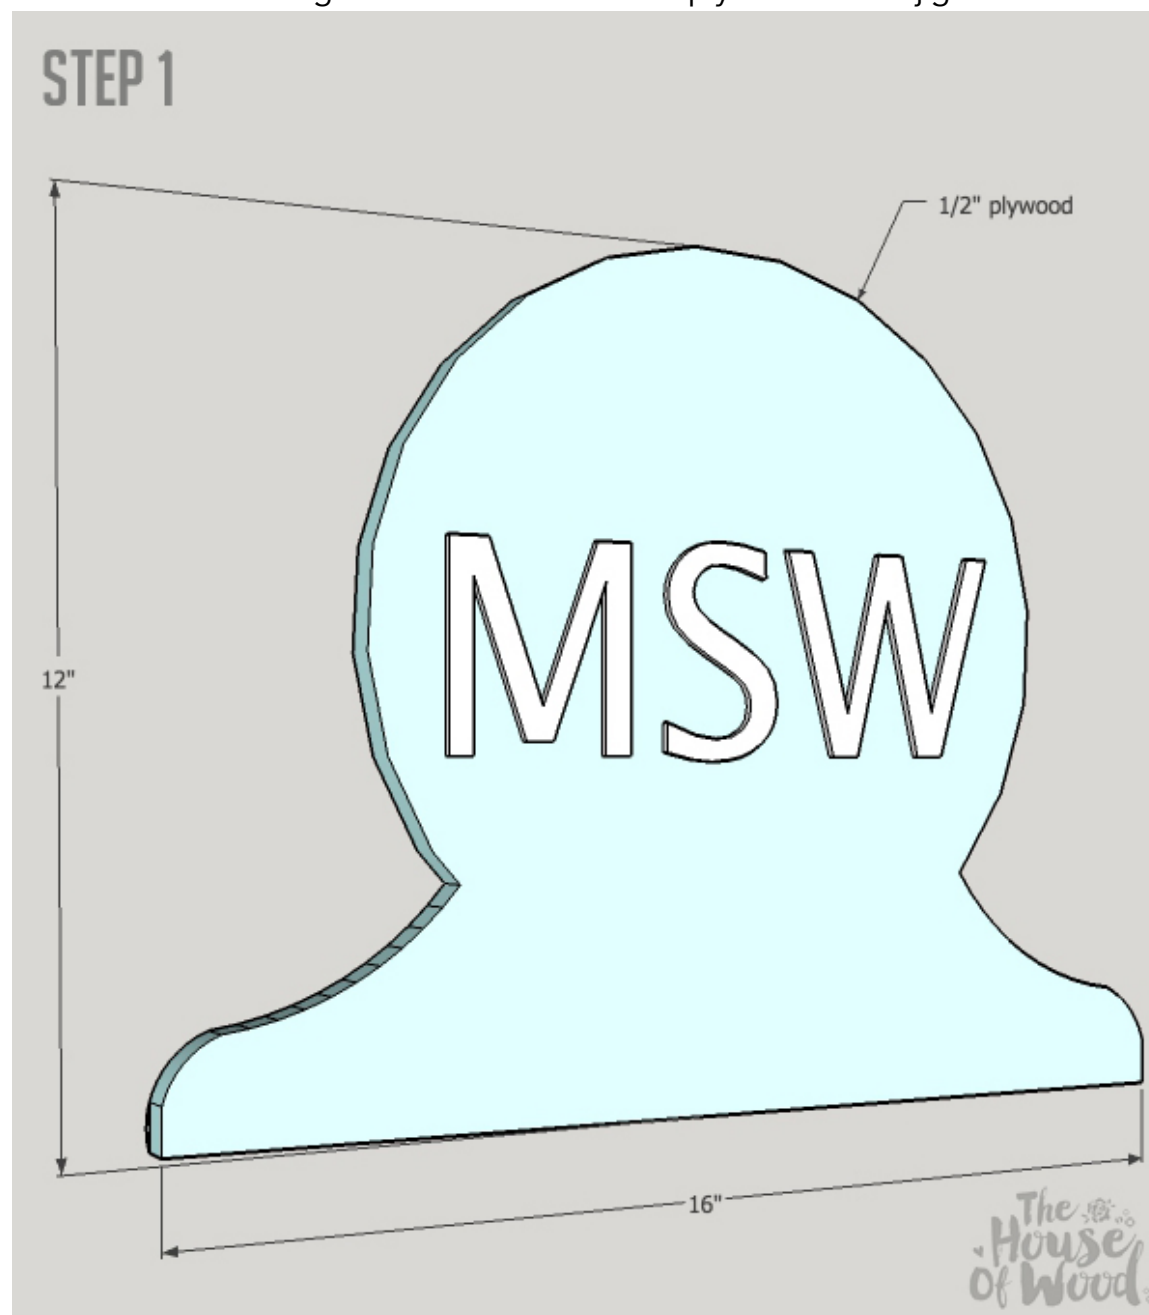

Circular Saw

Mallet

Hearing Protection

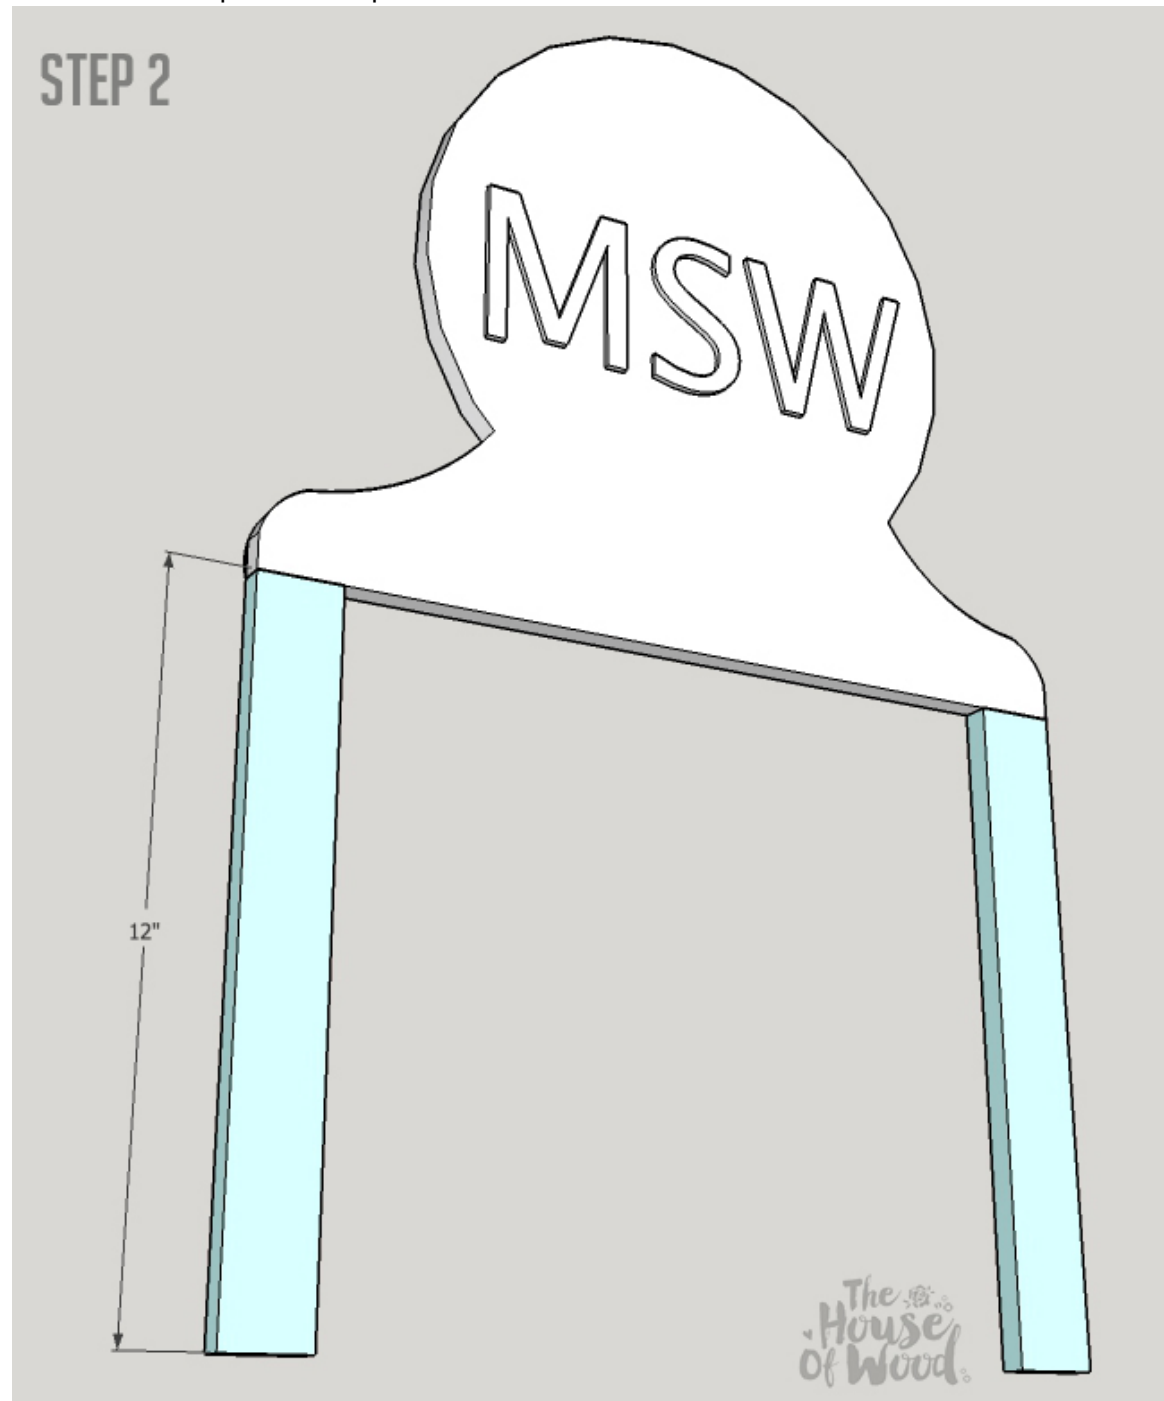

STEP 1

Sketch out the monogram and cut it out of 1/2" plywood with a jigsaw or scroll saw.

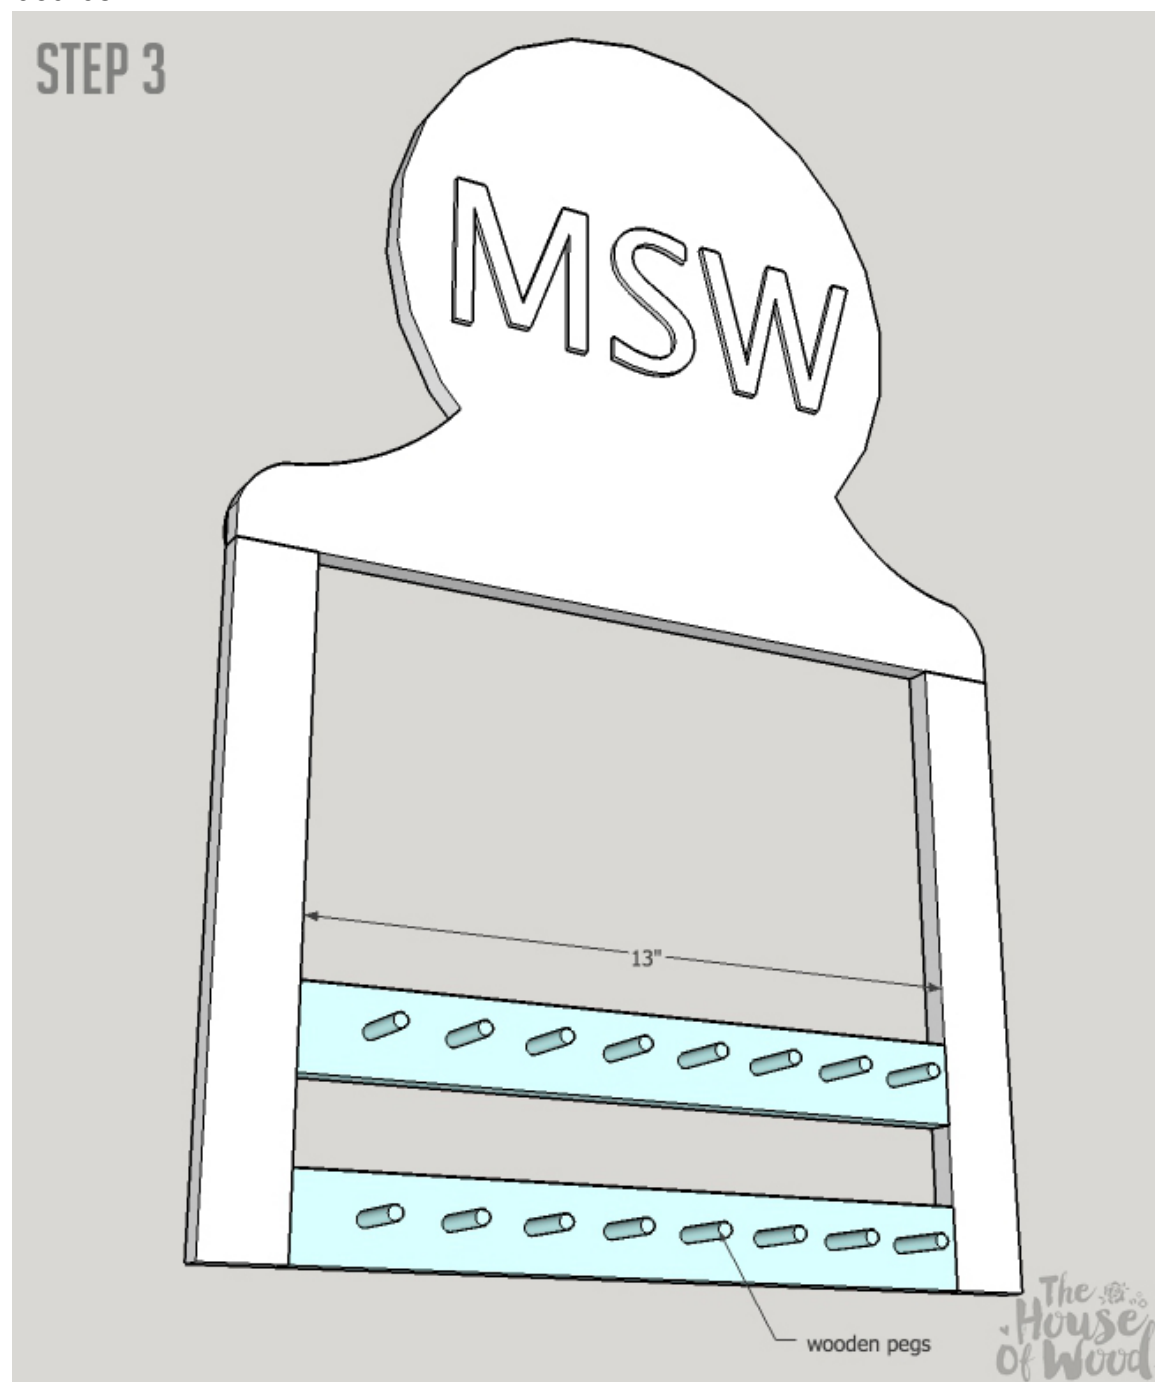

STEP 2

Glue and clamp the side pieces as shown.

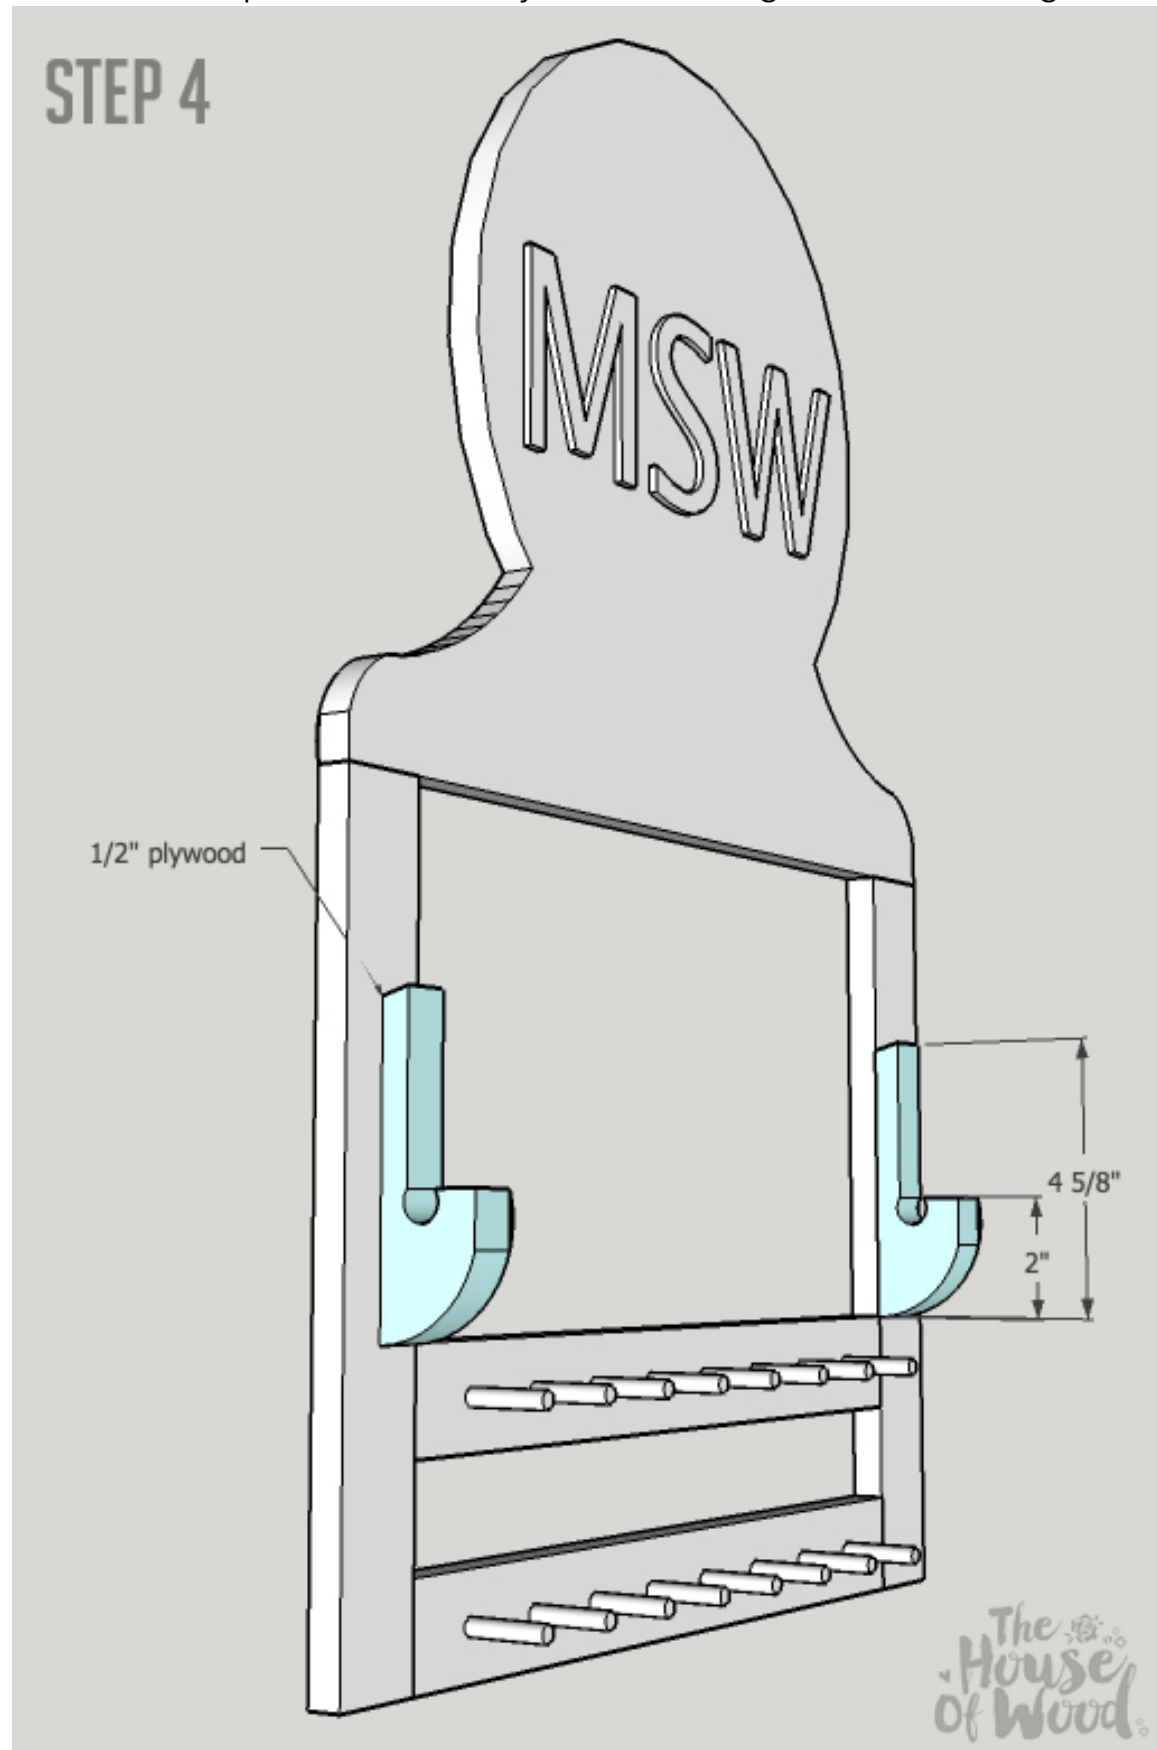

STEP 3

Using a 13/64" drill bit, drill the holes for the wooden pegs then hammer them into place. Glue and clamp the peg boards as shown. There is a 1 1/2" space between the top and bottom peg boards.

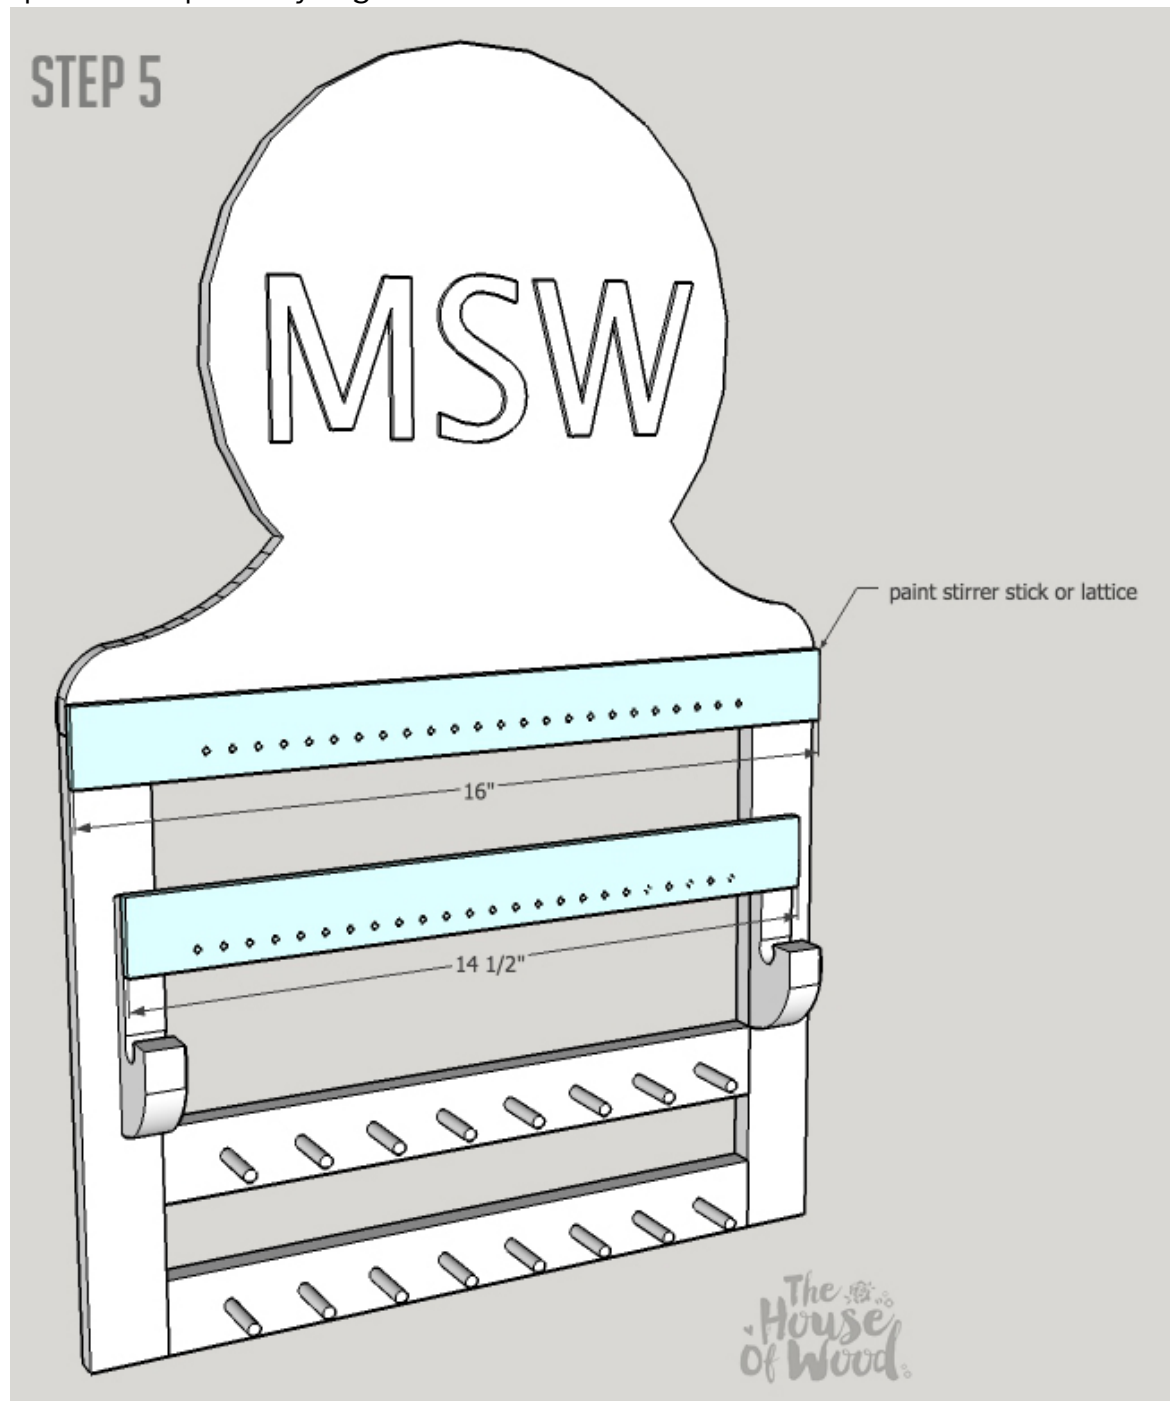

STEP 4

Cut out the “J” pieces that will carry the dowel and glue them to the organizer as shown.

STEP 5

Using a 3/32" drill bit, drill the holes for the earring holders and attach to the organizer as shown. I recommend creating a template out of a piece of scrap so that the holes are evenly spaced and perfectly aligned.

STEP 6

You may have to drill a larger hole into the wooden balls so that the 3/8" dowel will fit into it. Glue the balls on the ends of the dowel and let dry.
